

# Intel's former co-director for South Asia joins eInfochips

**Ahmedabad:** Intel's former co-director for South Asia and director of Intel's India Development Center Avtar Saini has joined eInfochips, an Ahmedabad and Santa Clara-based provider of electronic design services. "I am keen to work with India's young technical talent and I wish to mentor

them in working on core product design work and build the made in India brand. I am pleased to join eInfochips board at such an exciting time and I look forward to contribute towards company's continued success," said Mr Saini. Mr Saini has seven microprocessor-related patents over the past

**Mr Saini was responsible for the first phase of development of Intel's first implementation of 64-bit architecture**

two decades under his belt. In a career spanning close to 22 years at Intel, he has worked in various capacities in the areas of micro-

processor design and development. "Avtar's long illustrious career in Intel coupled with business and engineering management expertise in India and a strong technology background makes him uniquely qualified to work with technology companies. We appreciate the breadth and depth

of knowledge that his presence on the board will bring to eInfochips," said Mr. Pratul Shroff, CEO, eInfochips. An electrical engineer, Mr Saini was responsible for the first phase of development of Intel's first implementation of 64-bit architecture—the Itanium processor. — **Our Bureau**
