

# eInfochips to train faculties of engineering colleges

## Launches 'Train the Trainer' initiative in partnership with DDU, Nadiad

**DNA Correspondent.** Ahmedabad

Amid hue and cry about the engineering curriculum being obsolete in present context with the daily advancement of technology, state based engineering colleges and companies are joining hands to update the knowledge of faculty members eInfochips, Gujarat's leading chip and systems design services company, on Wednesday inaugurated a 5 day 'Train the Trainer' programme in partnership with the Dharamsinh Desai University (DDU), Nadiad.

The main focus of this initiative is to bring uniformity in the engineering education system, strengthen the fundamentals of

the subject for the faculty members and expose them to emerging technologies. Over 36 faculty members from institutions across Gujarat have enrolled for the programme.

Pratul Shroff, CEO of eInfochips, said, "Today, successful organizations and managers realise that people are the key resource in maintaining a competitive advantage. To create a pool

of competent semiconductor technology students, it is imperative to have a uniform fundamental engineering education system. Therefore it is crucial for faculty members to develop their skills in a manner that enables them to have an effective exchange of ideas and viewpoints with the professionals of tomorrow. The primary aim of organizing this programme is to confer faculty with up-to-date knowledge of the semiconductor industry practices and standards and thus help the students to start their career in the best possible way."

Nikhil Kothari, head of the department electronics and communication engineering at DDU, said, "This is program is a move in the right direction, as knowledge of faculties in the area of VLSI technology should be updated with the passage of the time. The company is providing training with latest technology in the field."
