## **eInfochips sign MoU with BIT**

**AHMEDABAD:** Gujarat-based embedded design and software product developer eInfochips along with its knowledge partner Seer Akademi, signed an MoU with Babaria Institute of Technology of Shree Krishna Educational Charitable Trust. It is aiming to impart training and support research activities to help in building the skills of engineering graduates. eInfochips will be the local and implementation partner for the course offered jointly with Seer Akademi. Besides giving technical support in lab development at college site, eInfochips will also help in training faculty coordinators and reach out across Gujarat. Seer Akademy is an educational content provider for Synopsys University Programs. BIT has been identified as a 'Centre of Excellence' by Synopsys, a software and IP for semiconductor design, verification and manufacturing. Courses are planned to be available starting fall 2010.
