## BIT signs MoU with eInfochips, Seer Akademi

Officials of eInfochips and Seer Akademi sign a MoU with city-based Babaria Institute of Technology during a function on Friday

TIMES NEWS NETWORK

**Vadodara:** State's leading software product development company - eInfochips - along with its knowledge partner Seer Akademi signed a memorandum of understanding (MoU) with city-based Babaria Institute of Technology (BIT) on Friday to impart training and support research activities to help build skills of engineering graduates to make them more employable.

Under the MoU, BIT has been identified as a centre of excellence by Synopsys, a world leader in design tools and IP for semiconductor design, verification and manufacturing. eInfochips will be the local and implementation partner for the course offered jointly with Seer Akademi, which is an educational content provider for Synopsys.

Besides giving technical support in laboratory development at college site, eInfochips will also help in training faculty co-ordinators.

"In near future, there will be a major manpower shortage in the field of microelectronics. Through this industry academia collaboration, we aim to bridge that supply gap by generating employable personnel," CEO of eInfochips Pratul Shroff said.
